## Product Notification: R-net CJSM2 – IR Configurator Library Codes

We regret to inform you, that due to an unavoidable, critical component change in Curtiss-Wright's CJSM2 Joystick Modules (JSMs), implemented to ensure uninterrupted product supply, it will no longer be possible to insert Library Codes from the R-net PC Programmer IR Configurator utility (pictured above).

The ability to learn IR codes from IR handsets is unaffected by this change. For additional information on IR learning and library codes, please refer to the CJSM2 Technical Manual SK81302, Chapters 4 and 5 respectively.

Appendix 1 lists the JSMs affected by this change. The JSMs part number and issue number can be found on the product's serial number label e.g., 'D51595.07', where 'D51595' is the part number and '.07' is the issue number. Part numbers with earlier issue numbers than those shown in Appendix 1 are unaffected.

Appendix 1

Curtiss-Wright Description	Part Number	Issue Number
R-NET CJSM2-L	D51595	.07
R-NET CJSM2 BLUETOOTH	D51634	.04
R-NET CJSM2 700mm	D51642	.04
R-NET CJSM2 BLUETOOTH (NO CABLE)	D51842	.04
